

RFA CargoBay Installation Manual

Included
RFA CargoBay

Note: If RFA CargoBay will be used in conjunction with RFA SingSet, the RFA SlingSet should be installed first

 *RFA WheelSkirt cannot be used at the same time as RFA CargoBay*

Installing RFA CargoBay

Center the RFA CargoBay on the Utility Rack. Wrap the three upper hook and loop straps to the upper Utility Rack frame.

Wrap the forward hook and loop strap to the lower bike frame. Wrap the rear hook and loop strap to the lower rack frame. Pull both straps until snug.

Clip the two upper corner buckles around the back of the upper Utility Rack frame. Pull both straps until snug.

When carrying a load, the buckles at the opening of the CargoBay should be cinched tight. This secures your load while you ride.
